

## MINHATEX Green/Yellow/Blue/Red

- 70% Polyester / 30% Polyamide Microfiber
- Woven Microfiber Polishing Wiping Material
- For O.E.M. Usage approved

### Physical properties

Tests	Orientation	Units	Targets	Methods
Base Weight		g/m <sup>2</sup>	280	ERT 40.3-90
Thickness		mm	0.95	ERT 30.4-89
Tensile strength	MD	N/5cm	350	
	CD	N/5cm	350	
Tear resistance	MD	N	8.5	
	CD	N	8.5	
Elongation at break	MD	%	40	ERT 20.2-89
	CD	%	45	

### Standard Packaging

Tests	Units	Targets	Methods
Cloth size	cm	40 x 40	
Clothes/bag		20	

### Functions

Tests	Units	Targets	Methods
Absorption capacity	%	800	ERT 10.3-99

MINHATEX Woven Microfiber is a "bouclé" microfilament woven fabric

The Microfiber used is a Polyester/Polyamid low lint fabric with extreme tear resistance properties as well as perfect soil and grease retention.

The usage of this product is specifically designed to respond to the needs of polish compound removal within the automotive O.E.M. industry.

Its special woven "bouclé" shape not only reduces lint but also captures the compound within the woven threads. MINHATEX is silicone free.
