

## Novoclean Blue 50g/M<sup>2</sup>

- 50% Viskose / 50% Polyester + Akrylat Binder
- Blue Spunlace Material
- IPA Replacement Wiper based on Natural Solvents

The Nonwoven Industrial wiper Novoclean is a Strong, Textilefiber Wiper. It consists of an impregnated nonwoven material, free of silicones and lintfree material. The Wiper is supplied in wet condition as degreasing wiper and replaces the IPA and other harsh solvents limiting VOC emissions.

### Physical properties

Tests	Orientation	Units	Targets	Methods
Base Weight		g/m <sup>2</sup>	52	ISO9073.1
Thickness		mm	0.62	ISO9073.2
Virgin Fiber Part		%	100	
Recycling materials		%	0	
Bleaching				Non bleached
Color (incorporated into binder)				blue
Tear resistance	MD	daN	7.7	ISO9073.3
	CD	daN	2.5	ISO9073.3
Elongation at break	MD	%	37	ISO9073.3
Chemical		g/bag	250	

### Standard Packaging

Tests	Units	Targets	Methods
Cloth size	cm	32 x 36	
# sheets		300	
sheet size	mm	300x400	w x L

### Usage

The Nonwoven Novoclean wiper is used for surface treatment and cleaning.

The cleaning contains next to the elimination of grease also the wiping of liquid wax residues at the end of the UBS PVC Line and is used as replacement wiper for IPA.

Its formulation also ensure anti static buildup corresponding to the needs of plastic manufacturers.
